

# The Right Support in MY Home Pilot

Right Support aimed to develop a range of flexible options which provide the right level of support at the right time.

Smart Support complements supported living by creatively using technology that is individually customized to meet the unique needs and goals of each person supported.

## The Results

- 14 people participated in the pilot

- 5 people are now receiving support that enhances self-determination available to them at the right time as opposed to always having support just in case

- 5 people moved into their own home (from group living)
- Many more transitions are planned & underway

- Resources are becoming available as a result of technology and right-fit support to serve those currently on the waiting list
